

DR. SEMIRA BAYATI

WHY DID YOU BECOME A PLASTIC SURGEON It is suited to my meticulous nature. I'm very detail oriented
ALTERNATIVE OCCUPATION Concert pianist
HOBBIES Diving, fitness and anything related to the ocean
FRAMED PHOTOS ON YOUR DESK My sweet babies
PRO BONO WORK I dedicate some time each year to pro bono surgery for children
I START EACH DAY Feeling grateful
I WOULD LOVE TO OWN The skills of a professional skier

BREAKTHROUGH BEAUTY

Dr. Bayati's practice incorporates a fully staffed medi-spa for **NONSURGICAL ENHANCEMENT**. The doctor advises patients on various **ZERO-DOWNTIME PROTOCOLS AND PROCEDURES**, including liquid facelifts, noting that fillers and injectables are a rapidly advancing field, with many new breakthroughs on the horizon. While Dr. Bayati believes less is more when it comes to cosmetic enhancement, she also ascribes to the philosophy that sooner is better than later to jump-start an **ANTI-AGING REGIMEN**. "Ideally facial rejuvenation should start in the late 20s, with Botox to prevent lines from forming, then adding fillers and resurfacing techniques as you progress into the 30s and 40s," she says. "If you engage in preventive care and maintenance while you are young, you can delay surgical intervention later in life." Dr. Bayati uses these techniques to change a variety of facial features, restoring fullness to the cheeks, hiding jowls, filling lines and hollow areas under the eyes, and correcting other facial imperfections that appear with age. "All of these techniques create facial balance for many years prior to needing surgery."

INSIDE INFORMATION

perfect artistry

Newport Beach plastic surgeon Dr. Semira Bayati parlays her surgical aptitude in minimal-incision facial rejuvenation techniques—such as endoscopic forehead and mid-facelifts—as well as body-contouring procedures, into a global patient base that includes both locals and those from other countries. She has been featured on the Discovery Health channel several times for body contouring after massive weight loss and her “mommy makeovers.”

“Patients demand minimal downtime, great results and imperceptible incisions. I consistently strive to deliver this combination for my patients,” says Dr. Bayati, who is adept at both surgical and nonsurgical facial rejuvenation techniques. “It is a great time to be in the cosmetic surgery field. We have a variety of options for facial rejuvenation that combines fillers, Botox® and resurfacing techniques to produce ‘liquid, nonsurgical facelifts,’ with minimal downtime.” Dr. Bayati also performs many “mommy makeovers,” which consist of a tummy tuck, breast lift with augmentation, liposuction and vaginal rejuvenation, intended to restore post-pregnancy figures to their pre-baby proportions. Dr. Bayati characteristically brings a unique level of empathy and compassion to the consultation process. “Patients feel especially comfortable discussing concerns about their bodies with me because I can relate to them on a personal level and understand their body-image issues,” she explains.

Breast augmentation, rhinoplasty, breast reconstruction after mastectomy and facial implant surgeries are also part of Dr. Bayati's menu of services. While consultations and surgery command much of Dr. Bayati's attention, post-surgical care remains an equally high priority. “My perfectionist, thorough nature is ultimately a benefit to my patients.” In fact, the majority of her patients, which include other physicians in the community, are referrals from previous, satisfied clients. “My broad range of services and my expansive scope make me adept to assist with all of your aesthetic needs.”

BOARD CERTIFICATION

American Board of Plastic Surgery

MEDICAL DEGREE

Boston University School of Medicine
