

## **Kris Jenner facelift for Keeping Up with the Kardashians wedding for Kim**

7.26.11

Kim Kardashian “Momager” Kris Jenner recently revealed she underwent a facelift procedure in order to look her best for her daughter Kim’s upcoming wedding. This somewhat drastic move has led many to question, why?

According to **Orange County Plastic Surgeon Dr. Semira Bayati**, there is one golden rule everyone should follow when it comes to plastic surgery: “Just because you can, doesn't mean you should!”

Dr. Bayati says, “not only does Kris appear to have had a facelift, but also a rhinoplasty and some skin resurfacing. The rhinoplasty looks great, but I don't feel, she really needed a facelift yet! Her skin appears less natural now than before the surgery. Overall, she doesn't appear as rejuvenated as one should appear after this operation. One reason could be the fact that it was done prematurely!”

### **About Semira Bayati, MD, FACS**
