

Jenna Jameson Got Her Butt Done

4.16.12

Jenna Jameson's [porn](#) career is behind her, but it seems that ever since she quit the biz, she has spiraled into the black hole of [bad plastic surgery](#). On top of the multiple boob jobs, over the top lip plumping injections, pillow cheeks and the mega-Botox, Jenna recently has also had butt augmentation surgery.

Butt augmentation surgery is gaining popularity now that big butts are in style, and there are several different ways to go about getting that bootylicious look. Fat transfer injections are one of the more popular ways to augment the butt, but that requires liposuction to harvest the fat, and unlike other celebrities that have had this procedure done ([Kim Kardashian](#) and [Coco](#), for example) we don't think Jenna Jameson has enough fat to spare for this procedure. With that in mind, we think that Jenna Jameson's new bubble butt is the product of butt augmentation surgery with [butt implants](#)!

The [butt implants](#) are definitely not the beginning of Jenna Jameson's plastic surgery makeover as she has had a LOT of work done over the past few years. She's had so much work done on her face, that she hardly looks anything like her original self.

When the 38-year old retired pornstar's photos were reviewed by a panel of plastic surgeon's, this is what they had to say:

"This is way too much for an already attractive girl."

- Dr. Semira Bayati

"Some say that 'if a little is good, then more is better.' That is not the case when it pertains to cosmetic procedures. (If Jenna were to seek his advice) I would say stop. We have to preserve what looks natural"

- Dr. Vincent Afsahi

And while we definitely think Jenna Jameson has gone overboard with the plastic surgery and she is looking quite mask-like and scary, I am slightly less frightened by her 2012 face, then the plastic surgery trainwreckery that she was sporting in 2007. Yikes!
